01. Introduction

I Project Name

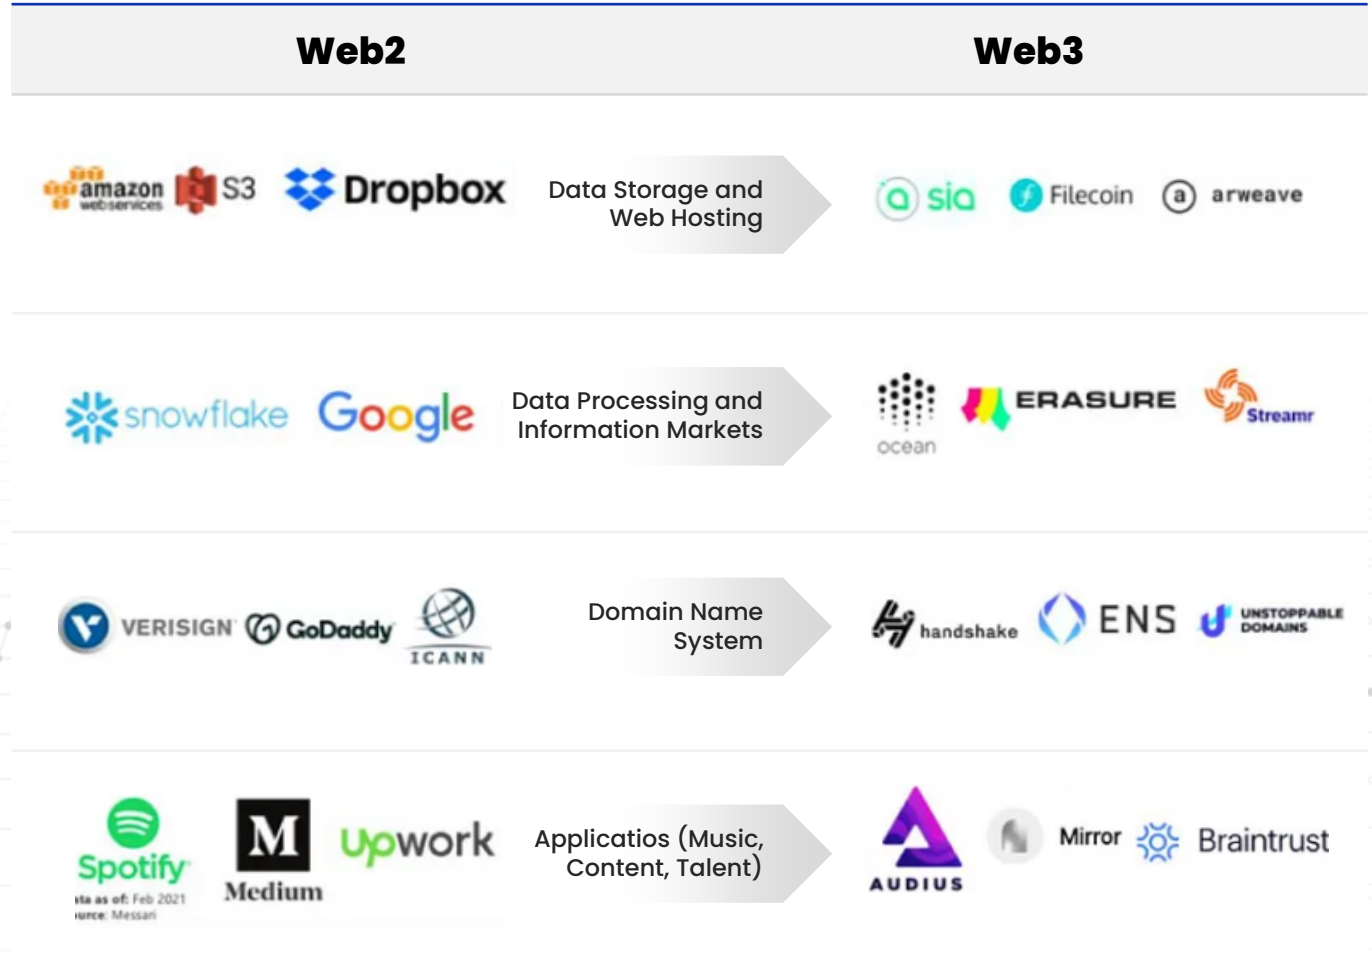

OceanDrive

Tagline

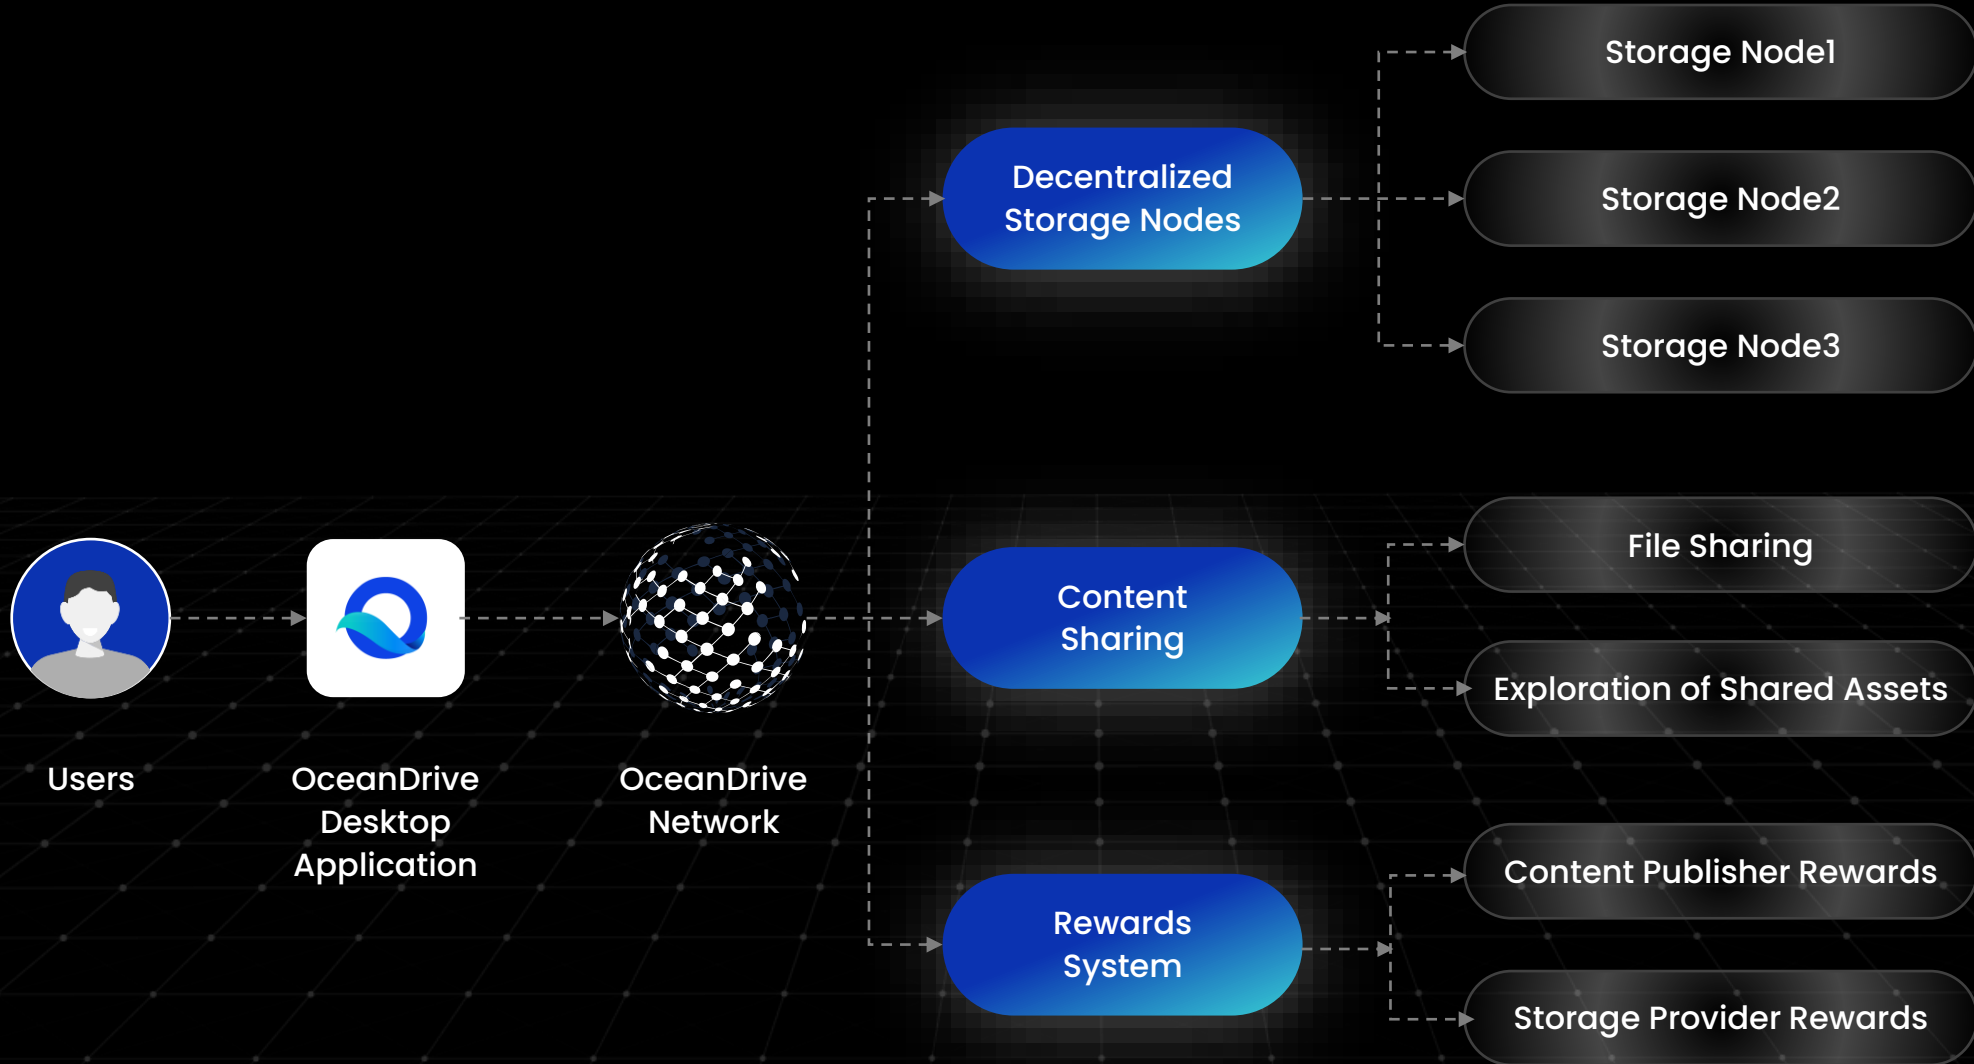

Explore, Share, and Earn with OceanDrive

Overview

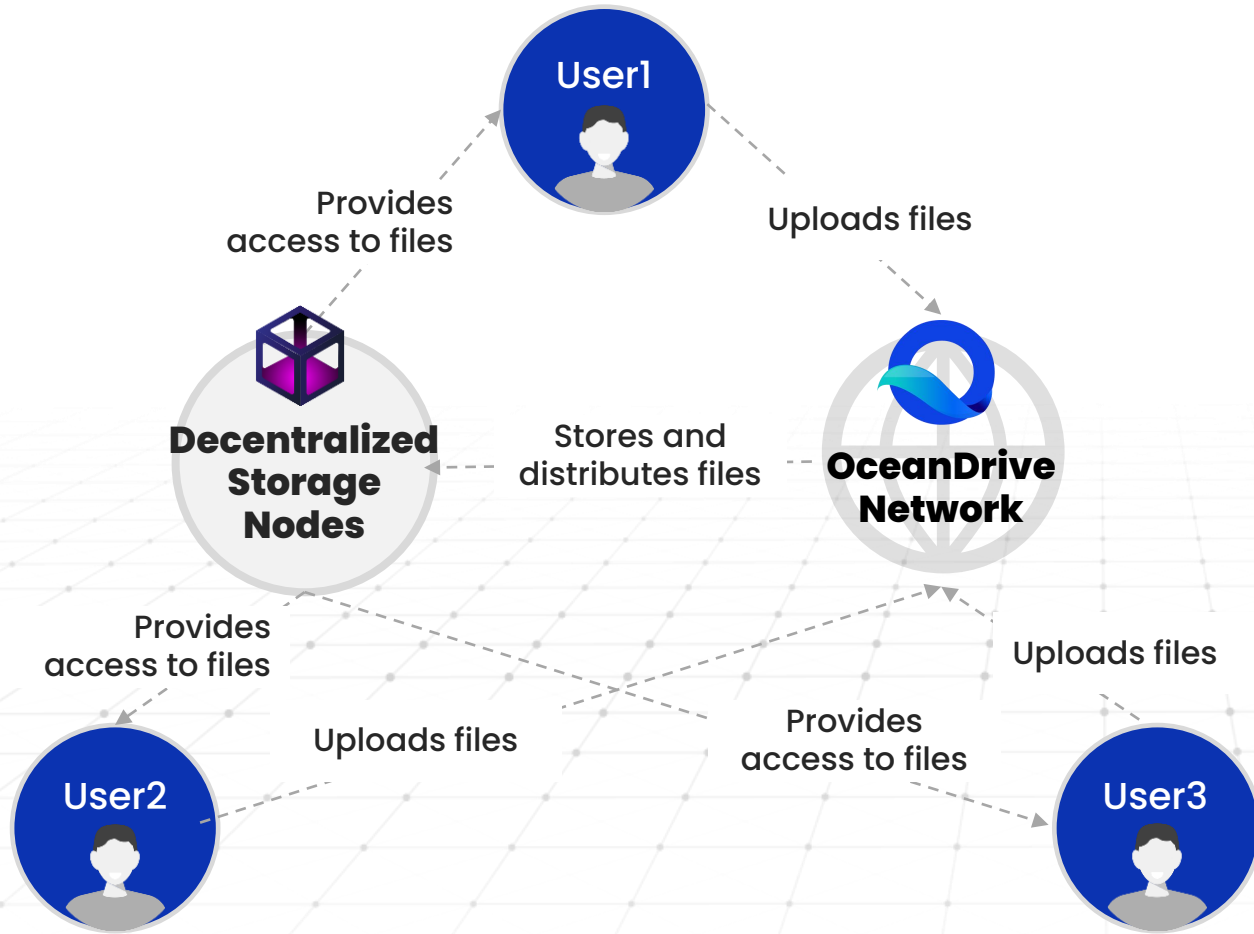

OceanDrive is a unique desktop platform that connects users worldwide, allowing them to share and explore storage assets conveniently and securely.

01. Introduction

02. OceanDrive Key Features

Secure and decentralized storage

Content sharing

Exploration of shared assets

Personal Storage Sharing

03. How OceanDrive Works

OceanDrive Participants

Users become network participants by connecting their computers to the OceanDrive network.

Content Publishing

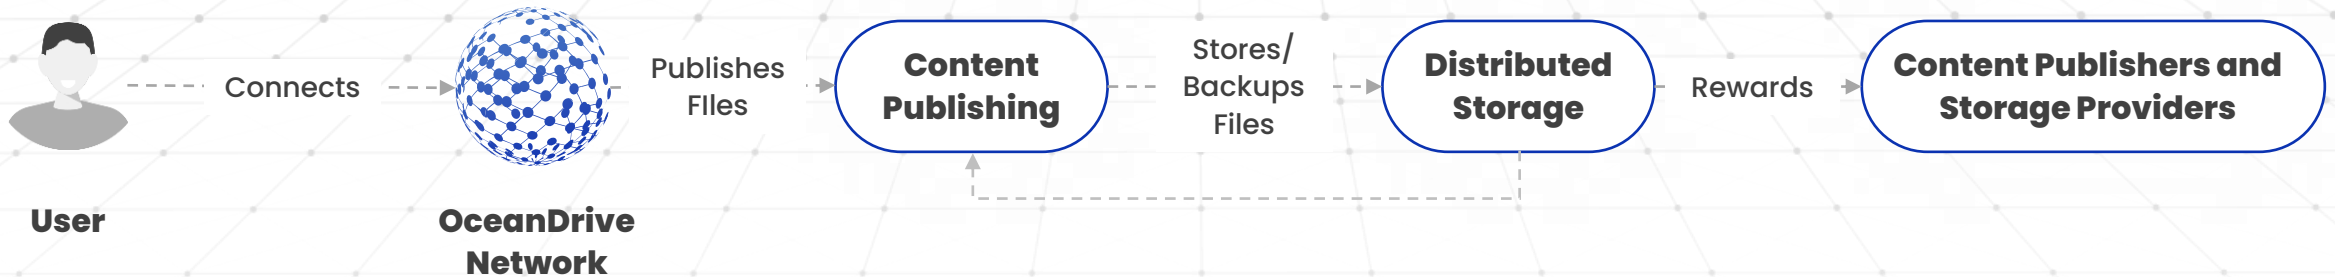

Participants choose Which files to publish and store/backup on the network.

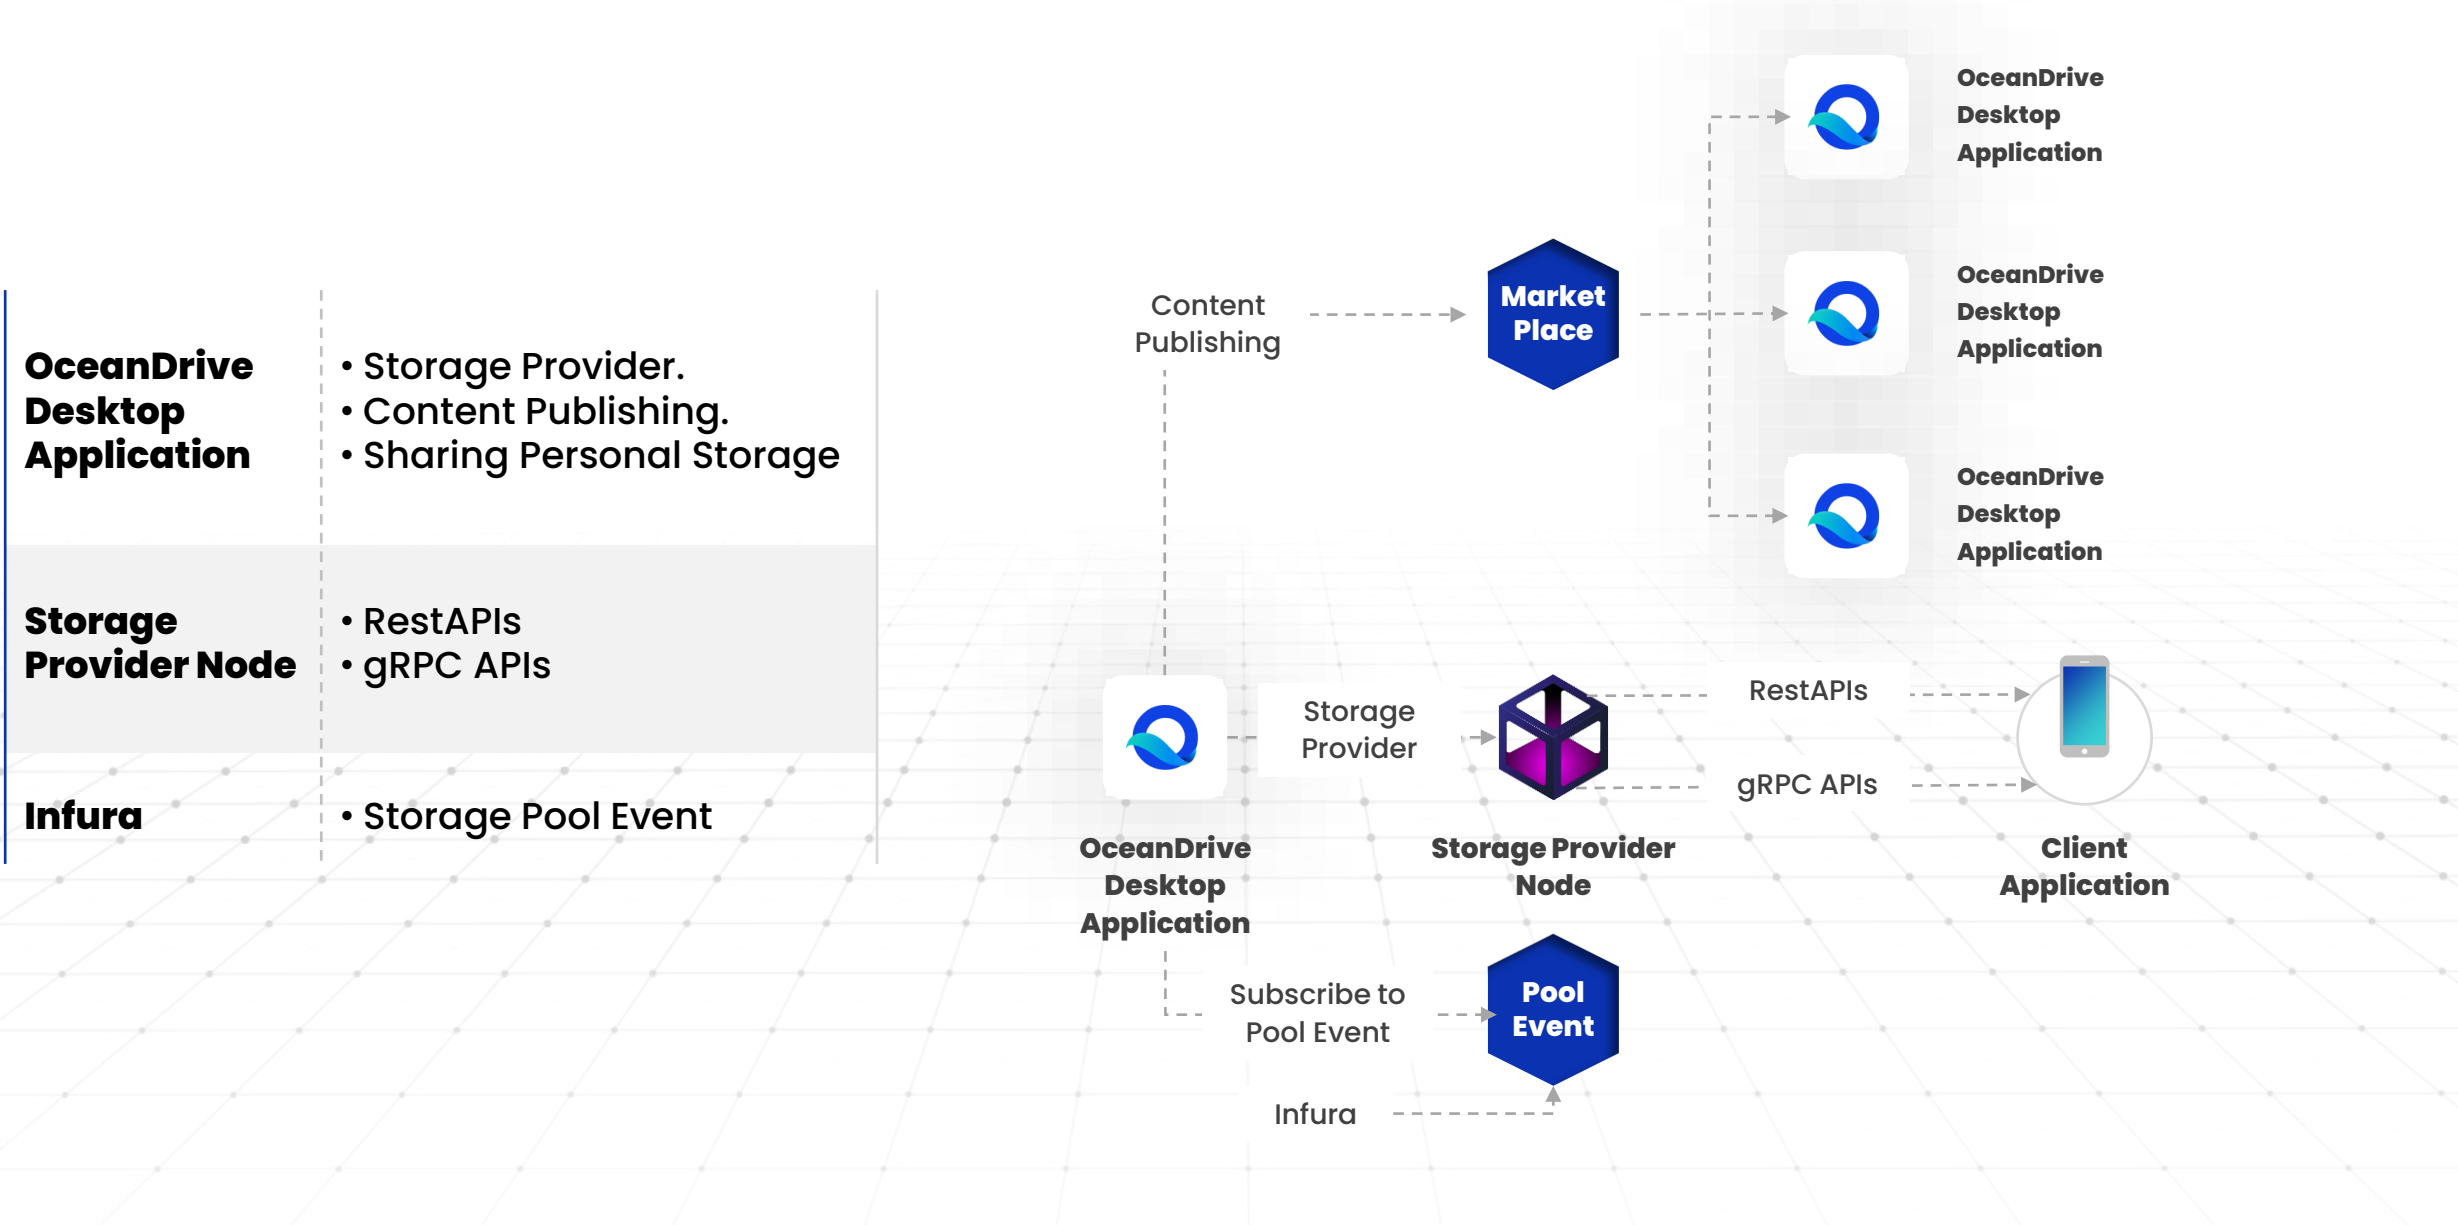

Rewards System

Content publishers and storage providers are rewarded by the network participants for their contributions.

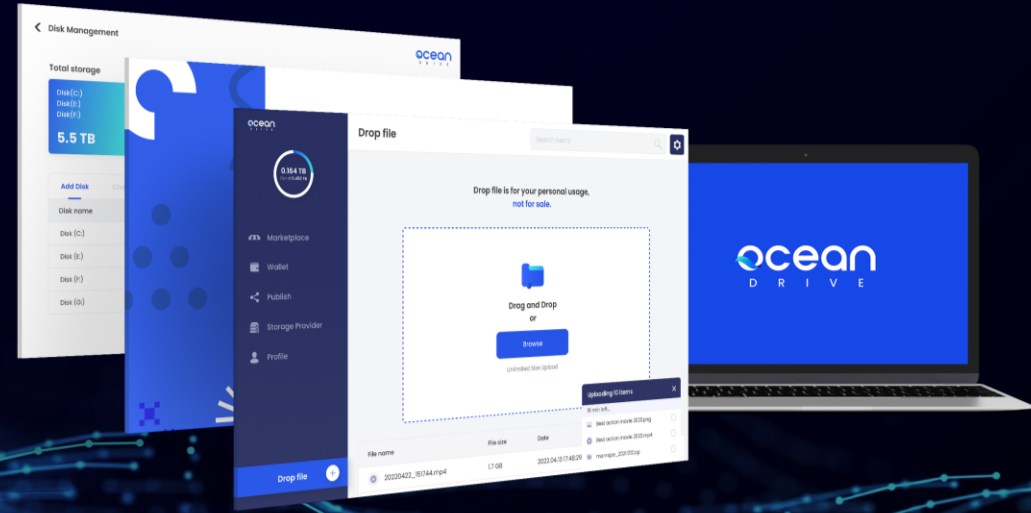

04. Ecosystem of OceanDrive

05. Types of OceanDrive Nodes

OceanDrive Desktop Application

A user-friendly application that automatically turns any device into a network member upon download. No additional settings required.

OceanDrive Desktop Storage Provider

Allows users to provide large storage capacities and host them. Controlled through CLI on Linux or VM-based devices.

06. Scalability and Simplicity

Elastic, Hosted Data Platform

OceanDrive offers a scalable and simple data platform that integrates decentralized data and authentication protocols seamlessly.

Performance and Reliability

Users can rely on OceanDrive's infrastructure to ensure high performance and reliability.

07. Solutions Offered by OceanDrive

OceanDrive Desktop Application

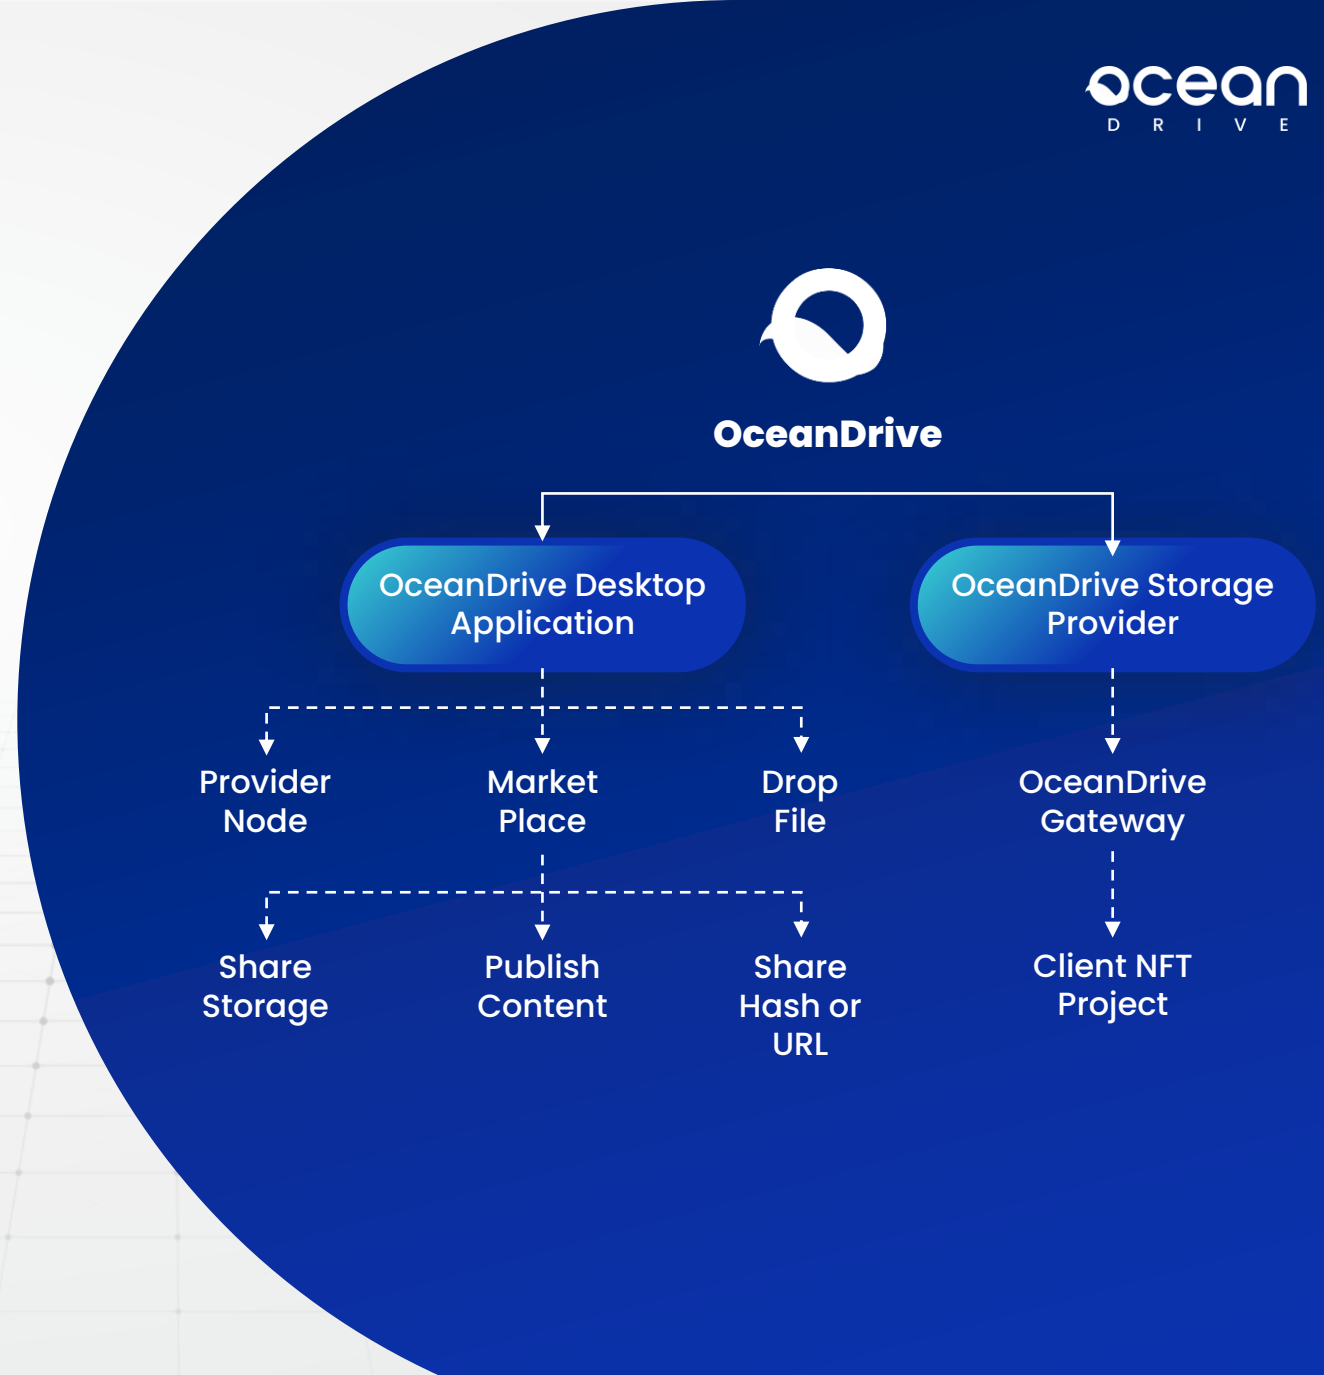

- No additional settings required.
- Easy-to-use interface for users.
- Free to use, with the ability to share and publish content.

OceanDrive Storage Provider

- Similar to the desktop application but =designed for users with large storage capacities.
- Requires some additional settings.

OceanDrive Gateway

- Designed for integration with storage HTTP API.
- Connected to DEXPO NFT project, storing minted digital artworks across OceanDrive Storage.

08. Advantages

Feature	OceanDrive	Cloud Storage	Decentralized Storage
Data Security	Secure and decentralized storage	Relies on centralized servers	Distributed across multiple nodes
Data Privacy	User-controlled access and encryption	Subject to service provider's policies	User-controlled access and encryption
Scalability	Elastic data platform	Limited by server capacity	Easily scalable by adding more nodes
Collaboration	Content sharing and exploration	Limited collaboration features	Promotes collaboration among users
Ownership & Control	Users retain ownership and control	Service provider retains ownership and control	Users retain ownership and control
Reward System	Rewards for content publishers and storage providers	No specific reward system	Incentives for participation and contribution
Infrastructure	Desktop-based platform	Centralized data centers	Distributed network of participant nodes
Reliability	High availability and fault tolerance	Dependent on server uptime	Redundancy and resilience against failures
Subscription Fee	No monthly subscriptions	Requires monthly or annual payments	No fixed subscription fee or dependent on service platform

Decentralized Storage

OceanDrive provides a secure and public decentralized storage solution, eliminating the reliance on a single centralized server.

Global Storage Unification

CONUN aims to unify the storages of all computers worldwide, creating a vast network of storage resources.

Seamless Integration

OceanDrive's elastic data platform integrates decentralized data and authentication protocols seamlessly, ensuring ease of use for users.

Cost-Efficiency

By utilizing unused storage space on personal devices, OceanDrive reduces the need for expensive centralized storage solutions.

Rewards for Contributions

Content publishers and storage providers are rewarded by the network participants, creating incentives for participation.

Asset Exploration

Users can discover and explore a wide range of shared assets on the OceanDrive network, opening up new opportunities for collaboration and knowledge sharing.

10. Use Cases of OceanDrive

01

Personal Data Backup

Users can securely backup their personal data, ensuring its safety and availability.

02

File Sharing and Collaboration

OceanDrive facilitates seamless file sharing and collaboration among individuals and teams, enhancing productivity and efficiency.

03

Content Distribution

Content creators can distribute their work across the OceanDrive network, reaching a wider audience and potentially earning rewards.

04

NFT Storage

OceanDrive integrates with DEXPO NFT project, providing a secure storage solution for minted digital artworks and collectibles.

11. OceanDrive Rewards System

Content Publisher Rewards

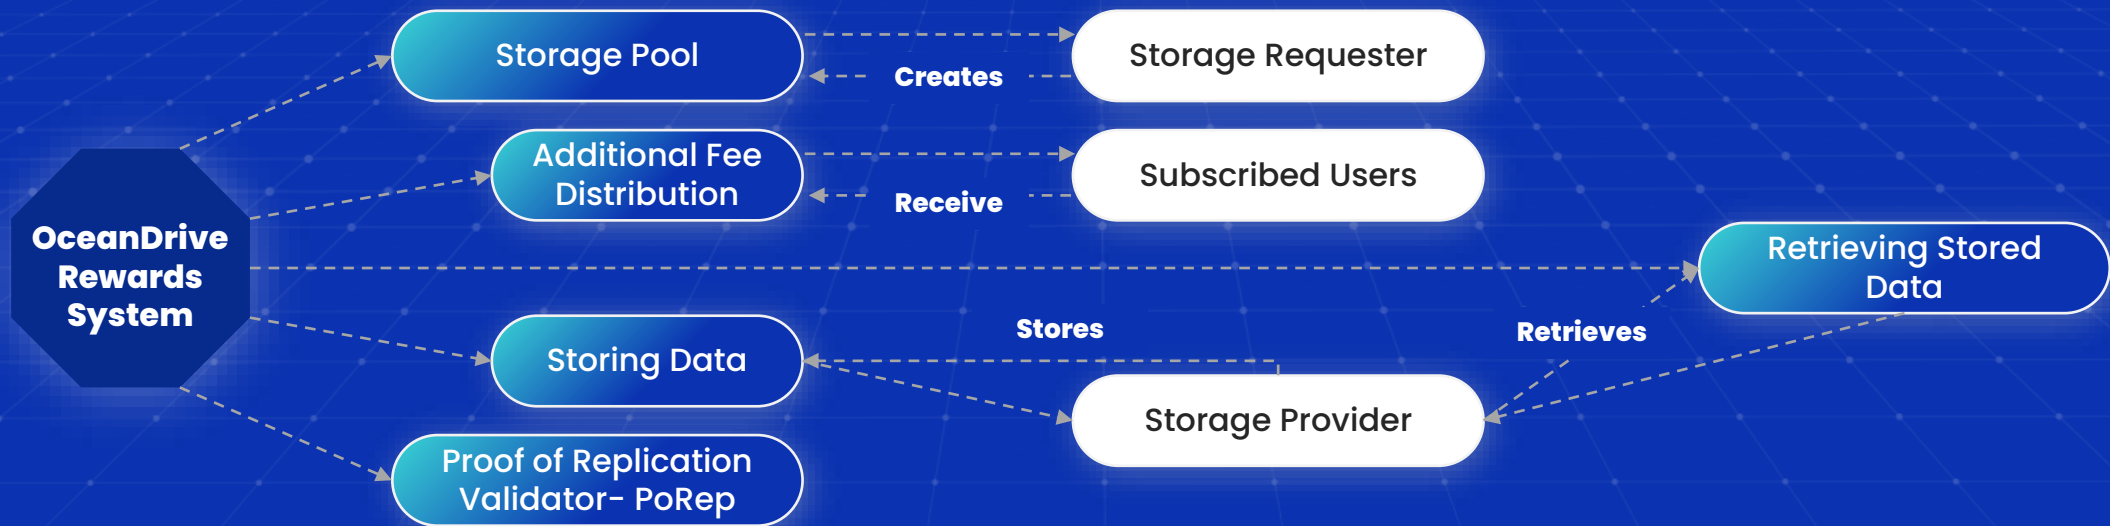

Publishers receive rewards based on the popularity and usage of their shared content

Storage Provider Rewards

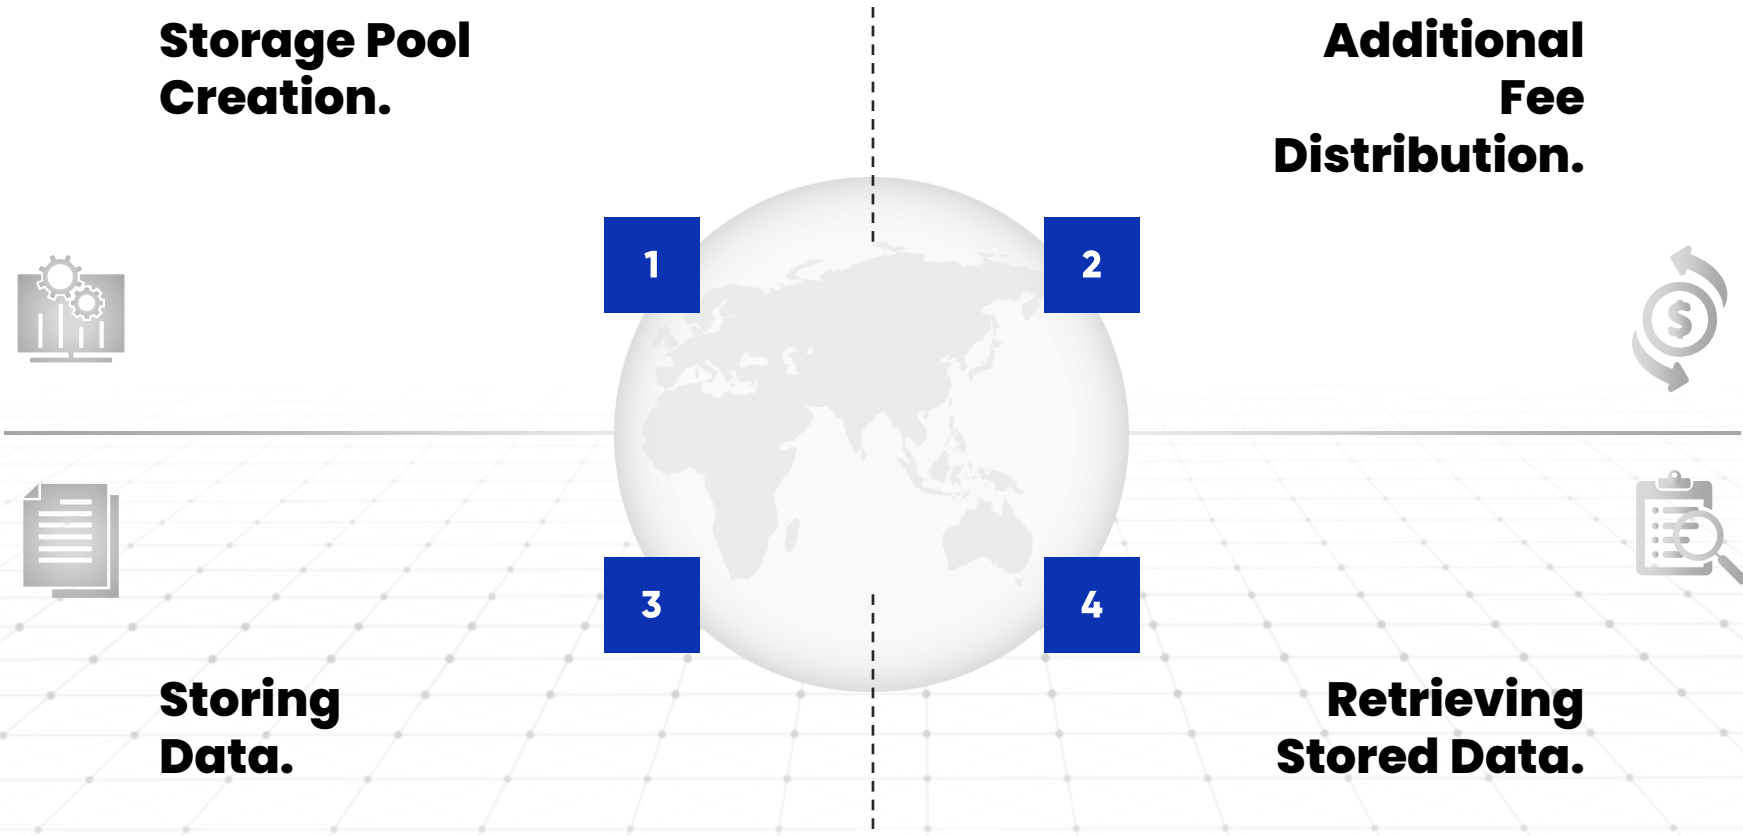

Storage providers are rewarded for offering their storage capacity to the network.

Token Economy

OceanDrive utilizes a token economy to distribute rewards and incentivize active participation within the network.

11. OceanDrive Rewards System

12. Content Encryptions

01

Encryption

OceanDrive implements robust encryption protocols to ensure the Privacy and security of stored data.

02

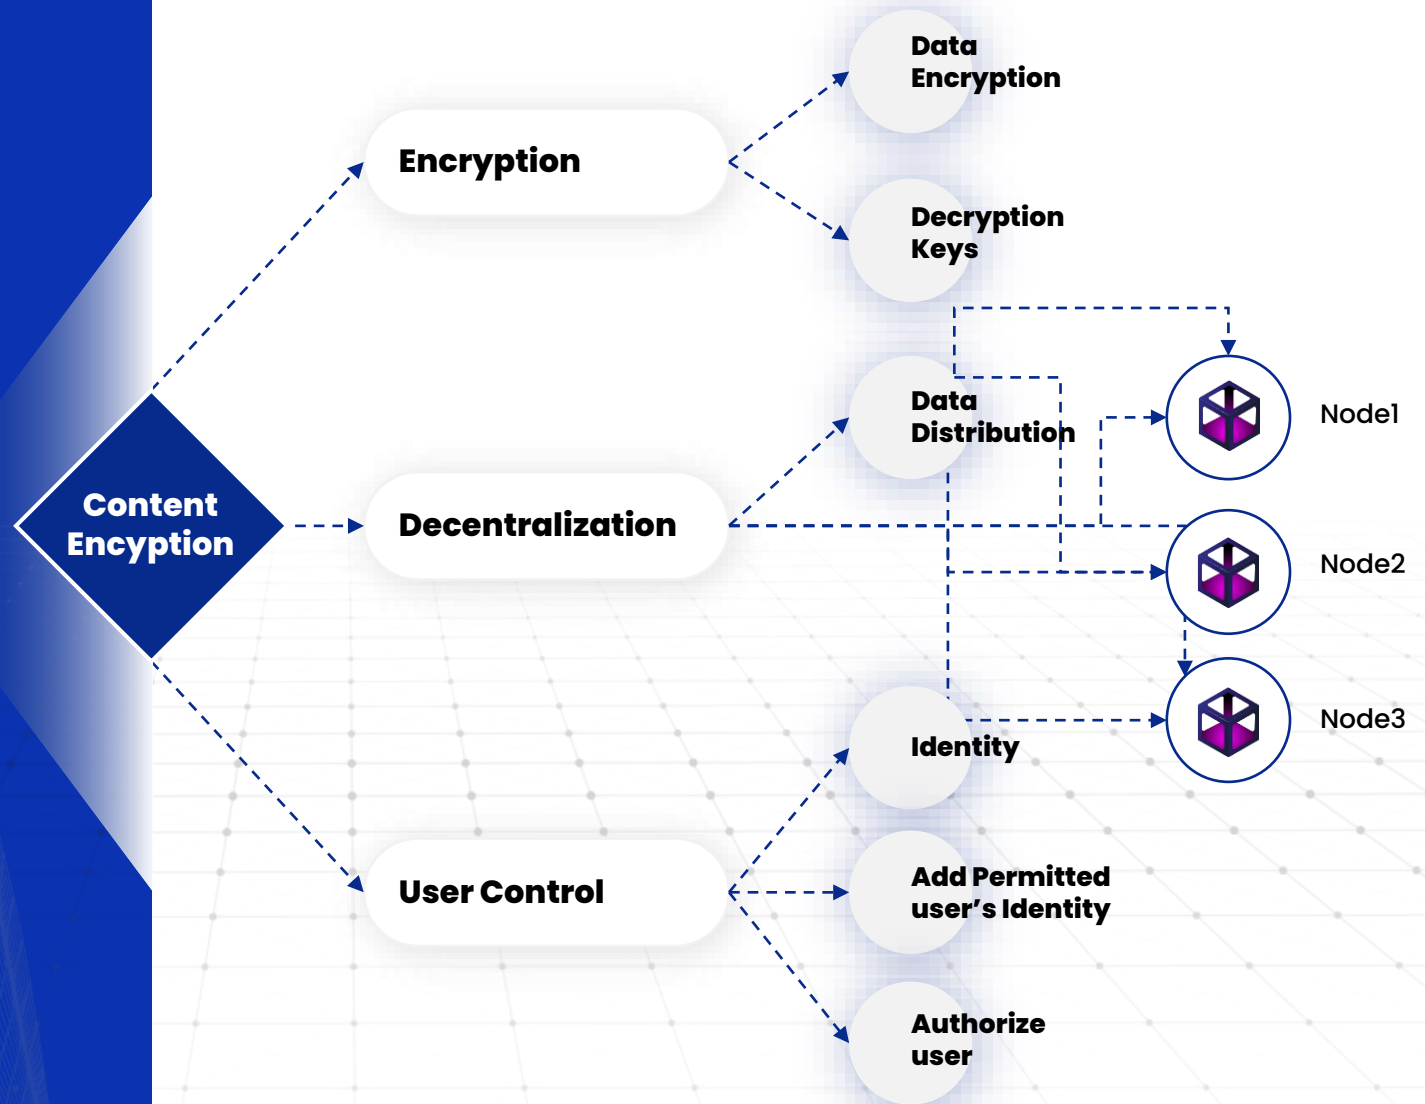

Decentralization

By distributing data across multiple nodes, OceanDrive minimizes the risk of data loss or unauthorized access.

03

User Control

Users have full control over their shared files and can choose who has access to them.

13. Roadmap and Future Developments

- OceanDrive Storage Provider
- Security Solution

Q2 2023

- OceanDrive Infura
- OceanDrive Gateway API

Q3 2023

- Integration with Metacon Mobile Application
- OceanDrive Rewarding Process

Q4 2023
